CUSTOM FIELDS

Add custom fields to any object.

Custom Fields let you add your own fields to any object in Conductor, so you can extend items like Projects, Tasks, and KPIs to make them fit your organization and programs.

For Calculated Custom Fields, chat with Harmony AI. Describe the calculation you want in natural language and Harmony will write the formula for you.

Custom Fields

Define custom attributes scoped to a workspace or system-wide. Workspace-scoped fields are only available within that workspace.

HarmonyField assistant

Add a calculated field for budget variance as a percent of budget.

Here's a calculated field for Projects. It updates automatically when budget or actual spend changes.

Budget Variance % = (Budget - Actual Spend) / Budget × 100

Ready to add Project - Number (%)Edit formula

Ask Harmony to create or change a field...

KPIs

Track project performance against your KPIs.

KPIs let you track financial and non-financial metrics and measures directly in Conductor, so you can ensure the benefits and value of your program are realized.

Your KPI results stay connected to the projects that drive them, instead of living in disconnected spreadsheets.

REVIEWS

Start every health review with a first draft.

Project Health Reviews now come with a first draft written by Harmony AI, based on the workplan and progress already in Conductor.

You review it, edit what you need, and submit it.

The screenshot displays the Conductor project management interface. The main view is the 'Revenue Growth Platform' project overview, which includes a navigation bar with tabs for Overview, Tasks, Business Case, Financials, Risks & Issues, Files, Details, and Meeting Notes. The overview shows key metrics: Task Completion at 80% (8 of 10 tasks, +12% vs last month), Total Savings of \$2.4M (cumulative to date, +\$180K vs forecast), and Schedule Health as 'On Track' (3 days buffer, No change). Below these is a 'Stage Gate Progression' section with a timeline from L0 to L5. A modal titled 'Add Review' is open on the right, showing a 'GOVERNANCE RULE' (All project leads must submit a monthly RAG review by the 8th of each month), a 'RAG STATUS' selector (Red, Amber, Green), and a 'REVIEW COMMENTS' section with a suggested review by Harmony AI. The modal also includes 'Use draft' and 'Edit' buttons, a text input for additional comments, and 'Cancel' and 'Post Review' buttons at the bottom.

Revenue Growth Platform
Expand revenue streams through platform enhancement and new market channel activation across Q1-Q3.

REVIEW COMMENTS
+ Harmony Suggested review
Revenue Growth Platform is tracking well on budget and scope. Timeline shows a 1-week slip on the Q1 deliverables due to resource reallocation. Recommend amber status with a note on the resource conflict resolution timeline.

TASKS

Manage your project workplan and tasks.

Tasks show your workplan as a Gantt timeline (Kanban board coming soon).

Tasks also include sub-tasks, comments, and file management.

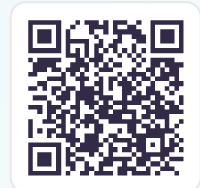

We also shipped

- Approval Requests: approval workflows with full audit trails.
- Portfolio & Projects: see projects grouped under their portfolios in one view.
- Project Details: one page with everything about a project.
